# Executive Summary

The Post-Secondary Enrollment Options (PSEO) program was created in 1985 and has been used by tens of thousands of Minnesota high school students to prepare for college, save millions of dollars in college tuition on an annual basis, access expanded course options, and get a head start on their career. In the 2026 PSEO Information Gap Report, People for PSEO found that the majority of websites in Minnesota were not in compliance with a PSEO law (124D.09, Subd. 7) which requires independent school districts (ISD) and charter schools to provide up-to-date information about the PSEO program on their school websites. The Minnesota Department of Education has provided explicit information to public schools about what information must be posted on district and charter websites to meet the law's requirements. This 2026 report, in partnership with Catalyst for Systems Change builds on the findings from 2024 by reviewing PSEO information on 386 school district and charter school websites.

Minnesota students and families need up-to-date information about the PSEO program to make informed decisions about whether to participate. Knowing about the program, as well as having complete and accurate information about the program can make a difference of thousands of dollars for students. Since 2015, the Minnesota Department of Education (MDE) has reminded high school leaders and administrators on an annual basis to follow PSEO law by sharing up to date information with students and families on their website and in other materials. Our measurements indicate that these efforts have resulted in little change in high school compliance rates.

This report finds that only **123/386 (31.87%)** of district and charter websites are fully compliant and up to date, without any missing or inaccurate information. This data indicates that a majority of district and charter schools are not informing students with up-to-date or accurate information on the PSEO program, despite reminders of compliance requirements from stakeholders and MDE. State law requires that schools provide up to date information about PSEO, by not providing accurate information, not only are families and students not receiving the information they need to make informed decisions, schools are breaking state law.

## Key Findings

| PSEO Page Status | 2022 | 2023 | 2024 | 2026 |
|---|---|---|---|---|
| PSEO Page is up to date | 153 | 163 | 163 | 123 |
| PSEO Page is up to date and has inaccurate information | 4 | 6 | 22 | 34 |
| PSEO Page has missing information | 175 | 139 | 122 | 123 |
| PSEO Page has missing and inaccurate information | 31 | 36 | 54 | 43 |
| PSEO Page cannot be found | 25 | 36 | 29 | 42 |
| PSEO Page link is broken | 2 | 10 | 1 | 21 |
| TOTAL | 390 | 390 | 391 | 386 |

# Introduction

## About the Post-Secondary Enrollment Options (PSEO) Program:

The PSEO program, enacted by the Minnesota Legislature in 1985, was the first dual-credit program of its kind in the nation. Today, thousands of high school students use the PSEO program to meet their high school graduation requirements while earning free college credits at the same time. To further explore the PSEO program, we encourage readers to access informational resources from the Minnesota Department of Education and People for PSEO.

## Previous Research on PSEO and Dual Credit

Research demonstrates that enrollment in the PSEO program saves money for students and taxpayers, closes high school graduation education disparity gaps, and results in higher college completion rates when compared to students who don't enroll in PSEO. Research states programs like PSEO are especially valuable to students from low income families, and students who traditionally have not entered or graduated from some form of post-secondary education. This research demonstrates the importance of sharing up-to-date information with students and parents. Below are a few summaries:

> "...the overall growth rate of traditional PSEO programs in Minnesota is still low relative to other dual credit programs in the State. PSEO remains in third place amongst the four most popular dual credit programs: Advanced Placement (AP), International Baccalaureate (IB), and Concurrent Enrollment (CIS). Economically disadvantaged students and students of color are enrolled in PSEO at lower rates than whites and students not coming from low-income families."
>
> Barriers and Challenges to Participation in Postsecondary Enrollment Options (PSEO) for Minnesota Students, 2019

> "Analyzing the revenue formulas put in place by the Legislature for the several programs, PSEO is the most cost-effective approach. In FY2021, state and local taxpayers will save an estimated $15.1 million for students taking PSEO compared to other dual enrollment programs… Under PSEO alone, a reasonable estimate [of savings for students] for FY 20-21 is $59.8 [million] annually."
>
> Dual Enrollment Programs in Minnesota, A Comparative Revenue Analysis, 2020

> "Some of these benefits are attributed to enhanced "academic momentum," due to students gaining confidence that they are capable of college-level work after experiencing courses in high school (Karp et al., 3 2008). This exposure may also allow them to develop a sense of agency and belief in their capacity to navigate the higher education system."
>
> Identifying Best Practices to Improve Access to PSEO, 2022

> "Minnesota's dual enrollment programs, through all modalities, provide students with access to college courses that make them more likely to go to college, more likely to attend college, and improve postsecondary outcomes for students … However, across the student listening sessions, a consistent set of messages recurred about the

ways in which students have interacted, or not interacted with, Minnesota's dual enrollment:

Students Lack Information About PSEO: Many students say they are not receiving information about the programs, and if they do, it is from friends or parents and not from their schools. Parents have a big influence, but many don't know/aren't in a position to help students with enrollment.

Students Must Navigate Gatekeepers to Access PSEO: Students reported that they are being actively dissuaded from participating in PSEO as not the right option for them by counselors and other gatekeepers within the schools. Students also report not being allowed to participate in school activities, particularly if they are participating in PSEO classes full time.

Students Are Not Receiving Consistent Communication About the Options, and Potential Value of, College Course Experiences in High School: Students are not correctly being informed about the value of participating in these course experiences, particularly in high school and before, and therefore are not seeking them out. Without deliberate efforts to communicate with students about the opportunities for PSEO and CE (beginning in the years prior to their eligibility), they will continue to reproduce current equity gaps for postsecondary enrollments."

Improving Minnesota's Dual Enrollment Funding System, 2023

"Males, low-income, and low-achieving high school students all appear to benefit from participation in dual enrollment to a greater extent than their dual enrollment peers who enter college courses with more social, economic, and educational advantages. These findings indicate that dual enrollment can benefit a range of students, and may have the greatest positive impact on those students who are often excluded from participation."

CCRC at the Teachers College of Columbia University, 2008

"A growing body of research suggests that allowing students in high school to complete even a single college class could significantly increase their chances of attending college and eventually graduating. … The theory behind dual enrollment is that enabling high school students to experience real college coursework is one of the best ways to prepare them for college success."

Jobs for the Future, 2013

The following pages demonstrate with data from the Minnesota Department of Education that participation in the PSEO program significantly decreases disparities in high school graduation rates and college completion rates.

## History of MDE Notifications to High Schools on PSEO Law

PSEO law (MN Section 124D.09 Subd. 7) mandates that high schools provide information to students and families about the PSEO program on an annual basis. The law states that,

> **"Subd. 7.Dissemination of information; notification of intent to enroll.** By the earlier of (1) three weeks prior to the date by which a student must register for school district, charter school, or Tribal contract school courses for the following school year, or (2) March 1 of each year, a school district, charter school, or Tribal contract school must

> provide up-to-date information on the school district's, charter school's, or Tribal contract school's website and in materials that are distributed to parents and students about the program, including information about enrollment requirements and the ability to earn postsecondary credit to all pupils in grades 8, 9, 10, and 11. To assist the school district, charter school, or Tribal contract school in planning, a pupil must inform the school district, charter school, or Tribal contract school by October 30 or May 30 of each year of the pupil's intent to enroll in postsecondary courses during the following academic term. A pupil is bound by notifying or not notifying the school district, charter school, or Tribal contract school by October 30 or May 30."

Periodically since 2015, the Minnesota Department of Education has detailed this law in their newsletter to Minnesota district superintendents and charter public school directors through the Superintendent and Charter Leader Update newsletter. Additionally, starting in February 2021, the MDE has provided updated guidance to districts and charter schools. This updated guidance states that,

> "This requirement applies to both districts and charter schools. Please consider the following language as the minimum to support this statute requirement; you may copy and paste directly to your website or include in materials to families."

The full language provided by MDE can be found under "Methodology." According to these newsletters, MDE held online webinars in early 2022 to help school leaders understand their responsibility to share up to date information under PSEO law. Two newsletters dated for September 22, 2022 and January 27, 2023 informed district and charter school leaders of their statutory obligations under PSEO law and provided registration links to attend informational sessions to support high school counselors and administrators around common PSEO topics.

In Fall 2025, MDE hosted "Postsecondary Enrollment Options (PSEO) Topic Sessions," that covered various topics and frequently asked questions about the PSEO program, with a focus on guiding school districts on PSEO policy. Additionally, MDE provides a document published July 7, 2025 on the PSEO website titled PSEO Student Rights and Responsibilities, that lists the legal rights and responsibilities of both PSEO students and schools. These listed rights and responsibilities, along with the recommended MDE language, influenced the overall methodologies described later in this report.

## Previous Studies of the PSEO Information Gap (2014 - 2024)

Previous studies from 2014, 2015, 2016, 2020, 2022, 2023, and 2024 showed that information about PSEO is not reaching families and students.

The earliest attempt to measure the PSEO Information Gap dates to a January 2014 survey by the Center for School Change. Their report concluded that 90% of the 91 Minnesota high school websites studied were missing information about key elements of the PSEO law. This report, along with testimony from students, helped convince the 2014 Minnesota Legislature to amend the PSEO statutes to require high schools to share up-to-date information about PSEO on their website and in materials to students and families by March 1st of each year.

A year later, a 2015 report published by the Center for School Change titled, "Students and Families Need to Know About PSEO," studied the adherence of 87 school districts and chartered public schools to the new 2014 requirements and found that:

1. 99% of websites/materials reviewed did not provide information on transportation assistance for PSEO students from low-income families
2. 85% of websites/materials reviewed did not provide up to date information about the 10th grade PSEO option
3. 99% of websites/materials reviewed do not provide information on the availability of online PSEO courses

During the 2019 Legislative session, the March 1st dissemination of information deadline was amended to require school districts to share PSEO information by either March 1st or three weeks prior to course registration for the next academic year (whichever comes first). This change was the result of testimony by PSEO students Asiya Browne, Zeke Jackson, and Mackenzie Pelowski that:

1. They didn't learn about PSEO until they had signed up for classes for the following academic year
2. Many colleges and universities opened PSEO applications as early as January of each year, leading some students to only learn about PSEO during end of college application periods

The last measurement of the PSEO Information Gap by the Center for School Change was detailed in a January 2020 report. This document, analyzing a stratified random sample of 95 high school websites was entitled, "Dual Credit: Opportunity and Equity Indeed." This study examined the high school website adoption rates of these recent amendments to PSEO law. Among other conclusions, the report found that:

1. None of the 95 websites mention the revised notification schedule provisions adopted by the 2019 Minnesota state legislature
2. 92 of 95 districts/charters did not provide all of the legislatively required "up to date" information about PSEO, such as the requirement that high schools must allow students to use high school computers and internet resources to take PSEO courses online

People for PSEO released our first report in our 2022 PSEO Information Gap Report. This report studied 390 district and charter schools that must share up to date information on their website. This report found that:

1. 40% of 390 websites were up to date and fully complied with state law
2. 44% of websites did not include the revised notification schedule provisions adopted by the 2019 Minnesota state legislature
3. 9% of 390 websites provided factually inaccurate information about PSEO
4. 7% of 390 websites didn't provide any information about PSEO

People for PSEO released another report in our 2023 PSEO Information Gap Report. This report studied 390 district and charter schools that must share up to date information on their website. This report found that:

1. 42% of 390 websites were up to date and fully complied with state law
2. 44% of websites did not include the revised notification schedule provisions adopted by

the 2019 Minnesota state legislature
3. 9% of 390 websites provided factually inaccurate information about PSEO
4. 12% of 390 websites didn't provide any information about PSEO at all

People for PSEO released our most recent report in our 2024 PSEO Information Gap Report. This report studied 391 district and charter schools that must share up to date information on their website. This report found that:

5. 42% of 391 websites were up to date and fully complied with state law
6. 53% of websites did not include the revised notification schedule provisions adopted by the 2019 Minnesota state legislature
7. 19% of 391 websites provided factually inaccurate information about PSEO
8. 7.5% of 391 websites did not provide any information about PSEO at all

This report, coauthored by People for PSEO and Catalyst for Systems Change aims to build upon the foundation set by previous research on high school websites. Over the last decade, the high schools studied in this report have been consistently reminded by the Minnesota Department of Education of their obligations to fully inform high school students about the PSEO program.

# Methodology

Measuring website data is a low cost quantitative method of measuring the high school compliance with PSEO state law. This study was not designed to perform a comprehensive analysis of the variables that contribute to the PSEO Information Gap. Some of these variables might include, but are not limited to, technical website errors, a lack of high schools' understanding of the statutory requirements, or local district policies and procedures that limit awareness of the PSEO program.

This report reviews the same 386 Minnesota district and charter public school websites as 2024 to determine if they are sharing up to date information about PSEO law. Each school studied serves students in grades 9-12. People for PSEO obtained this list of districts and charter schools from the Minnesota Department of Education website. From this list, we removed schools that do not serve grades 9-12, as well as schools that closed between 2024 and 2026. Of the remaining 386 websites, 321 are tagged as Independent School Districts (ISD) and 65 are tagged as Authorized Charter Schools (LEA). To this list, we added Minneapolis Public Schools, South Saint Paul School District, and Career Pathways Charter School resulting in a total of 386 websites in this study.[1] A full list of the websites studied, as well as their compliance with PSEO law, can be found at the end of this report.

[1]There are four exceptions to this methodology. The Minnesota Department of Education informed us that the Perpich Center for Recording Arts and Mn State Academies must follow subdivision 7, but are neither district nor charter schools. They are tagged as "ISD" for the sole purposes of this study. In addition, Minneapolis Public Schools and South Saint School Paul District were not included in the MDE list of Independent School Districts, but were included and tagged as "ISD" for the sole purposes of this study.

## Question Analysis

The 386 websites were reviewed by the authors and volunteers. Any missing or incorrect information is the sole responsibility of People for PSEO and Catalyst for Systems Change.

### Factor 1: Is PSEO Information Complete?

The PSEO language shared by MDE with districts and charters is considered to be, 'the minimum to support this statute requirement.' As such, any district website that did not contain *all* of the following information was categorized as *not* up to date:

> *Postsecondary Enrollment Options (PSEO) is a program that allows 10th-, 11th- and 12th-grade students to earn both high school and college credit while still in high school, through enrollment in and successful completion of college nonsectarian courses at any eligible postsecondary institution in Minnesota. Most PSEO courses are offered on the campus of the postsecondary institution; some courses are offered online. Students must meet the PSEO residency and eligibility requirements and abide by participation limits specified in Minnesota Statutes, section 124D.09. To assist the district in planning, a student must inform the district/charter school by May 30 (for fall term enrollment) or October 30 (for spring term enrollment) of their intent to enroll in postsecondary courses. The district/charter school must provide counseling services to students and their parents or guardian before the student enrolls in courses to ensure that the students and their parents or guardian are fully aware of the risks and possible consequences of enrolling in postsecondary courses.*
>
> ***Student Eligibility***
>
> *Eleventh and 12th-grade students may take PSEO courses on a full- or part-time basis. Each participating college or university sets its own admissions requirements for enrollment into the PSEO courses.*
>
> *Tenth-grade students are eligible to enroll in **one** Career and Technical Education (CTE) course if they receive a reading proficiency score of "meets" or "exceeds" on the 8th grade MCA. If a 10th-grade student did not take the MCA in 8th grade, another reading assessment accepted by the enrolling postsecondary institution can be substituted. For students with disabilities, there is an alternative option to demonstrate reading proficiency. A 10th-grade student who enrolls in one CTE course and earns at least a grade C in the first term of enrollment, may take additional postsecondary courses in the subsequent term, not limited to CTE. Access the list of postsecondary institutions offering approved CTE courses to 10th grade students.*
>
> *If the district/charter school determines a student is academically not on track to graduate, the student may continue to participate in PSEO on a term-by-term basis beyond their cohort graduation date.*
>
> ***Tuition and Fees***
>
> *There is no charge to PSEO students for tuition, books or fees for items that are required to participate in a course; however, students may incur fees for equipment that becomes*

*their property when the course or program is completed, textbooks that are not returned to the postsecondary institution according to their policies, or for tuition costs if they do not notify the district by May 30 or October 30 and the district does not waive the date requirement.*

*Funding is available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses. For more information on these funds, access the PSEO Mileage Reimbursement Program Instructions.*

### *Other Helpful Information for Public School Students*

*Enrolling in a PSEO course does not prohibit a student from participating in activities sponsored by the high school.*

*High schools are required to provide access to space and technology during the core school day -- if needed -- for a student to participate in PSEO, but may not require students to attend the high school during online PSEO courses or remain in the high school for a specific amount of time. Students are expected to follow safety guidelines and school policy for leaving and entering the school building.*

*PSEO students must provide the school with a copy of their grades in each PSEO course.*

*Districts must transcript high school credits earned through PSEO by a ratio prescribed in statute. Districts have the authority to decide which subject area and standards the PSEO course meets. If there is a dispute between the district and the student regarding the number of credits granted for a particular course, the student may appeal the board's decision to the commissioner. The commissioner's decision regarding the number of credits will be final. Grade weighting policies for PSEO courses vary by district/charter school.*

*Postsecondary institutions are required to allow PSEO students to enroll in online courses consistent with the institution's policy regarding postsecondary student enrollment in online courses.*

*For current information about the PSEO program, visit the Minnesota Department of Education's Postsecondary Enrollment Options (PSEO) webpage.*

By comparing this language to the information found on the high school PSEO page, authors and volunteers answered the following questions:

1. Is the PSEO information up to date?
    a. (Yes/No/Unsure)
2. What is the PSEO Page Status?
    a. (Up to date/Up to date AND inaccurate information/Missing information/Missing information AND inaccurate information/PSEO Page cannot be found/PSEO link is broken)

In cases where a staff member or volunteer marked 'unsure,' the website was elevated to Beatrce Handlin, PPSEO Board President, to make a final determination on whether or not the PSEO

information was up to date.

## Factor 2: Why is PSEO Information Not Complete?

If the website was marked as either “Missing information” or “Missing information AND inaccurate information,” or “Up to date AND inaccurate information” the following questions were answered:

1. Does the website state that, “School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether online or on campus”
    a. (Yes/No)
2. Does the website state that, “By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families”?
    a. (Yes/No)
3. Does the website state that, “Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses”?
    a. (Yes/No)
4. Does the website state that, “Enrolling in a PSEO course does not prohibit a student from participating in activities sponsored by the high school.”
    a. (Yes/No)
5. Does the website include accurate information on 10th Grade PSEO.
    a. (Yes/No)

These questions were chosen for specific reasons.

1. Historically, districts have previously denied students reasonable access to school buildings and resources on the basis of their PSEO participation. This led to a change in state law that mandated that PSEO students must have reasonable access to the high school building. As a result, we were particularly interested in whether this information was being shared with students, as well as information that students are not prohibited from participating in activities sponsored by the high school.
2. The requirement that districts must provide PSEO information to all students in grades 8-11 by March 1st, “or three weeks prior to the date a student registers for courses,” is the most recent change to PSEO state law and took place in 2019. By measuring whether a website includes this language, we can reasonably determine whether a website has been updated since this change in state law. The MDE suggested language does not include the March 1 deadline, thus, not including language on March 1 does not mark a website as “missing information,” but it is still relevant information as pertains to this study.
3. Access to transportation reimbursement funds is a critical piece of knowledge for many prospective PSEO students - especially low-income students. Anecdotally, People for PSEO has heard from current PSEO students that they were unaware of funds to assist with transportation expenses. By measuring whether a district shared this information, we can have a better understanding of whether students are receiving information about a critical piece of state law that is meant to improve equity to PSEO access.
4. The 10th grade PSEO option is a less commonly advertised or sought option, and as the data suggests, often is out of date or incorrect on school websites.

# Results: Website Analysis

Using the methods described above, this report concludes that 263 of 386 Minnesota high school websites studied (68.1%) do not provide all the up-to-date information as required by Minnesota's PSEO law. This is higher than 53% of websites not providing all the up-to-date information as found in the 2024 report. According to statute, all districts and charters should do what 123 websites (31.9%) are doing - providing up to date information with no omissions, and no inaccurate information.

## The Majority of Websites are Not Up to Date

Figure 1: Is the website up to date according to MDE's PSEO language requirement?

| Website Category (2026 Report) | Charter | ISD | Total | % of Total |
|---|---|---|---|---|
| PSEO Page is up to date | 33 | 90 | 123 | 31.87% |
| PSEO Page has missing information | 11 | 112 | 123 | 31.87% |
| PSEO Page has missing AND inaccurate information | 3 | 40 | 43 | 11.14% |
| PSEO Page is up to date and has inaccurate information | 10 | 24 | 34 | 8.81% |
| PSEO Page cannot be found[2] | 4 | 38 | 42 | 18.18% |
| PSEO Page link is broken | 4 | 17 | 21 | 5.44% |
| Totals | 65 | 321 | 386 | |

In Figure 1, we categorized each website into six different categories. Figure 1 shows that 123/386 have up to date information, while 34/386 have up to date information with inaccurate information as well. In total, 157/386 high schools, or 40.41%, contain all the PSEO information shared by the Minnesota Department of Education and required under state law. This was determined by adding the number of websites marked as "Up to date" to the number of websites marked as "Up to date; Contains inaccurate information." This can be done because a website can both a) comply with the mandatory requirements for sharing PSEO information and b) share additional information that is determined to be inaccurate. In other words, these categories are not mutually exclusive.

If the website contained some, but did not contain all required MDE information, we labeled it as 'missing information.' There were 166/386 (43%) websites that fit this criteria. This number can be found by adding the 123 websites categorized as "PSEO Page has missing information" and the 43 websites categorized as "PSEO Page has missing and inaccurate information."

Overall, we determined that 77 websites, or 19.95 % of the 386 websites studied, were sharing inaccurate information about the PSEO program.

[2] 13 websites marked as "PSEO Page cannot be found," did not have individual PSEO pages, and instead linked to the MDE PSEO website.

A website was labeled as ‘PSEO Page cannot be found’ after a thorough search was unable to find any PSEO information. Once this conditions was met, we concluded that either:

1. The high school does not have *any* PSEO information on their website, or
2. Their PSEO information is inaccessible to the average website user, or
3. They link to the MDE website instead of having their own page on PSEO, which removes school specific information.

42/386 (10.88%) websites were marked as “cannot be found.” 13 of these 42/386 websites marked as “cannot be found,” linked directly to MDE, without school specific information, accounting for 3.37% of websites.

When a high school website contained a link to PSEO information and the link was empty or produced an error, we categorized the website as, ‘PSEO Page link is broken.’ 21/386 (5.44%) websites had broken links or error messages either on the main website or the PSEO page.

## Total Website Compliance Has Returned to 2022 Compliance

In Figure 2, we measure a slight decrease in the number of websites that provide up-to-date information compared to our 2022 report. To reiterate, the website was marked “up to date” *only* if its PSEO Page Status was marked as “PSEO Page is up to date” or “PSEO Page is up to date and has inaccurate information.”

Figure 2: What is the difference in compliance from 2022 to 2026?

| Is the Website Up to Date? | 2022 Report | 2023 Report | 2024 Report | 2026 Report | Difference (2022-2026) |
|---|---|---|---|---|---|
| Yes | 157 | 169 | 185 | 157 | 0 |
| No | 233 | 221 | 206 | 229 | -4 |
| % Yes | 40.26% | 43.33% | 47.31% | 40.67% | -0.4% |
| % No | 59.74% | 56.67% | 52.69% | 59.33% | -0.5% |

These numbers are broken into smaller categories in Figure 3. We see a decrease in the number of up-to-date websites between 2024 and 2026, although this is accompanied by an increase in the number of websites identified as sharing both up-to-date and inaccurate information. This can be mainly attributed to a change in our measurement process. In previous years, we did not negatively mark schools for inaccurate statements about 10th grade PSEO enrollment. This year, we did, and this is the main reason for growth in this category. For the same reason, some schools previously categorized as missing information are now marked as missing information and sharing inaccurate information.

Accompanying these changes are a change in the number of pages that can’t be found and the number of links that are broken. This can be said to be a deterioration in the quality of PSEO websites since 2024.

Figure 3: What is the difference in PSEO Page Statuses from 2022 to 2026?

| PSEO Page Status | 2022 | 2023 | 2024 | 2026 | Difference (2022-2026) |
|---|---|---|---|---|---|
| PSEO Page is up to date | 153 | 163 | 163 | 123 | -30 |
| PSEO Page has missing information | 175 | 139 | 124 | 123 | -52 |
| PSEO Page has missing and inaccurate information | 31 | 36 | 52 | 43 | +12 |
| PSEO Page is up to date and has inaccurate information | 4 | 6 | 22 | 34 | +30 |
| PSEO Page cannot be found | 25 | 36 | 29 | 42 | +17 |
| PSEO Page link is broken | 2 | 10 | 1 | 21 | +19 |

As demonstrated by Figure 3 the number of websites that are compliant with PSEO law has fallen, while the number of pages with missing and/or inaccurate information has increased, and the number of websites that contain no information about PSEO at all has risen.

Figure 4: To what extent are websites sharing all, some, or no PSEO information?

| PSEO Page Status | 2022 | 2023 | 2024 | 2026 | Difference (2022-2026) |
|---|---|---|---|---|---|
| PSEO Page shares all required PSEO information<br>*PSEO Page is up to date +*<br>*PSEO Page is up to date and has inaccurate information* | 157 | 169 | 185 | 157 | -0 |
| PSEO Page shares some required PSEO information<br>*PSEO Page has missing information +*<br>*PSEO Page has missing and inaccurate information* | 206 | 175 | 176 | 166 | -40 |
| PSEO Page has no PSEO information at all<br>*PSEO Page cannot be found +*<br>*PSEO Page link is broken* | 27 | 46 | 30 | 63 | -36 |

## We Recorded 77 Websites as Sharing PSEO Inaccuracies

We categorized websites as containing ‘inaccurate information’ if the information provided to students may contradict state law or mislead students about the nature of the PSEO program. This report categorized the following statements as inaccurate. Some statements were recorded more than once across different websites.

Many inaccurate statements recorded in 2023 and 2024 were corrected by the time of publication of this 2026 report. However, inaccuracies around 10th grade PSEO enrollment requirements were overlooked during the 2024 PSEO Information Gap Report. This was addressed in the 2026 report leading to what seems like a major increase in inaccurate information, but may be a result of more comprehensive analysis, along with updates to statute. Websites were marked as providing inaccurate information about 10th grade PSEO enrollment if it did not state that 10th graders were eligible for PSEO, if they stated that 10th grade students may only take one PSEO course, or if they stated that 10th grade students may only take additional CTE courses after their

first semester of PSEO.

Websites were not recorded as having inaccuracies or missing information regarding the recently added October 30 deadline or information that "The district/charter school must provide counseling services to students and their parents or guardian before the student enrolls in courses to ensure that the students and their parents or guardian are fully aware of the risks and possible consequences of enrolling in postsecondary courses." For consistency sake, these two items were not measured in the 2026 report, but will be going forward.

## Websites Are Missing Recent Changes to PSEO Law

Figure 6 demonstrates that more than half of the websites studied in this report are missing recent amendments to PSEO law. PSEO law was most recently amended in 2019 and 2024. The 2019 amendment states that instead of sharing updated information about PSEO with students by March 1st, schools must now share updated information about the PSEO program by March 1st **"**or three weeks prior" to next year's course registration deadline. If a website fails to share this updated information, it is possible that it has not been updated since 2019. If a website did not include amendments on the October 30 deadline or information that "The district/charter school must provide counseling services to students and their parents or guardian before the student enrolls in courses to ensure that the students and their parents or guardian are fully aware of the risks and possible consequences of enrolling in postsecondary courses," it is possible the website has not been updated since 2024.

Figure 5: Does the website include any of these statements (2026)?

| | **# Yes<br>% Yes** | **# No<br>% No** |
|---|---|---|
| School districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus. (Subd. 11b.) | 174 | 212 |
| | 45.08% | 54.92% |
| By March 1 of each year, or three weeks prior to the date a student registers for courses for the following school year (whichever is earlier), schools must provide PSEO information to all students in grades 8-11 and their families. (Subd. 7.) | 212 | 174 |
| | 54.92% | 45.08% |
| Funds are available to help pay transportation expenses for qualifying students to participate in PSEO courses on college campuses. (MDE) | 243 | 143 |
| | 62.95% | 37.05% |
| Enrolling in a PSEO course does not prohibit a student from participating in activities sponsored by the high school. (MDE) | 177 | 209 |

# Website Examples

Using the methods described above, this report concludes that 229 of 386 Minnesota high school websites studied (59.32%) do not provide all the up-to-date information as required by Minnesota's PSEO law. This is an increase from 52% in 2023.

Through these short examples, we hope to impress upon readers the wide spectrum of quality PSEO information available to students, with examples from charter and ISD websites.

## Up to Date Information:

### Charter: Lakes International Language Academy

Lakes International Language Academy website contains all information recommended by MDE. This website is marked 'up-to-date.'

### ISD: Willmar School District

Willmar School District website contains all information recommended by MDE. This website is marked 'up-to-date.'

## Missing Information:

### ISD: Springfield Public Schools

The PSEO page of the Springfield Public Schools contains some information about PSEO but is missing critical information about the program. This website is marked as 'missing information.' Although it informs students that transportation funds exist for low-income students, it does not inform students that students must receive updated PSEO information by March 1st or three weeks prior to course registration or that school districts must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus. Their page also excludes information about how PSEO students can participate in school activities.

### Charter: Watershed High School

The PSEO page of the Watershed High School includes some information about PSEO but is missing critical information about the program. This website is marked as 'missing information. It does not include information that schools must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus. Their page also excludes information about how PSEO students can participate in school activities. Links to the MDE page.

## Inaccurate Information:

### Charter: STEP Academy Charter School

The PSEO page of STEP Academy Charter School contains information about PSEO, but critical information about the program is missing, skipping over that 10th graders can participate in the program, which marks it as inaccurate, along with not including information on funds for transportation. It does not include information that schools must allow a PSEO student reasonable access to the high school building, computers and/or other technology resources during regular school hours to participate in PSEO courses, whether on-line or on campus. Their page also excludes information about how PSEO students can participate in school activities.

### ISD: New Prague Area School District

The PSEO page of New Prague Area Schools contains some information about PSEO, but critical information about the program is missing. In addition, this page shares information that is potentially in conflict with PSEO statutes. New Prague Area School District's dual enrollment guide states, "Juniors: must be in the top 33% of their class to participate in PSEO, & Seniors: must be in the top 50% of their class to participate in PSEO." This is not a requirement of statute.

# Conclusion & Recommendations

This analysis of district and charter websites demonstrates that access to quality online information about PSEO is highly dependent on the school in which the student is enrolled.

A majority of schools studied **59.32**% do not meet the dissemination of information language requirements under state law as defined by the Minnesota Department of Education. Of the 386 websites studied, 63 websites (19.93%) do not include any PSEO information at all (though, 13 link out to MDE) and 77 websites (19.94%) may share inaccurate information about the PSEO program.

These findings demonstrate that, after nearly a decade of consistent reminders by the Minnesota Department of Education, the majority of district and charter schools are not in compliance with state law. For this reason, we recommend the following steps to close the PSEO Information Gap:

1. The Minnesota Department of Education has already implemented mandatory reporting procedures through the Notice of Student Registration Form to ensure student eligibility for PSEO under state law. Similarly, we recommend that the MDE establish reporting requirements for high schools by mandating the annual submission of their PSEO webpage links and the specific dates on which they informed students and families about the PSEO program via printed materials. This measure would ensure that high schools are also adhering to the requirements found in PSEO state law.
2. The Minnesota Department of Education should review and apply appropriate enforcement mechanisms (such as that found under MN Statute 127A.42) to district and charter schools that do not satisfy their statutory obligations.

3. The Minnesota Department of Education should conduct targeted outreach to schools whose websites have missing or inaccurate information about the PSEO program to ensure that they are actively working to improve their website.
4. The Minnesota Department of Education should hire an intern or assign responsibilities to MDE staff to receive and review PSEO websites for accuracy of PSEO language, and make recommendations to districts on compliance.
5. The Minnesota Legislature and Office of the Legislative Auditor authorize and complete a study and report of PSEO that includes issues raised in this report.

Further research is needed to determine the extent to which this directly contributes to disparities in overall PSEO enrollment rates. For example, future research may attempt to identify a correlation between the participation rates of PSEO students per district and the quality of PSEO information available on their websites. Other research might work to understand the relationship between participation rates and school size or location. However, a lack of public data on PSEO enrollment patterns prevents such research from taking place**.** School districts are not required under state law to provide enrollment information about students enrolled in PSEO courses according to agreements or "PSEO by Contract" until the next MDE rigorous course taking report. This student population may make up to 50% of all PSEO enrollment. This lack of public data on the PSEO program must be addressed to better measure the impact of the PSEO Information Gap on PSEO enrollment trends and on high school and college graduation rates.

With these new findings, People for PSEO and Catalyst for Systems Change recommend that the Minnesota Department of Education rethink their approach to enforcing PSEO law.

# Acknowledgements

People for PSEO is a Minnesota-based nonprofit organization whose mission is to promote, defend, and expand opportunities for high school students through the PSEO program. We support the PSEO program as a means to break cycles of poverty, close education disparity gaps, and reduce postsecondary attainment costs. To accomplish this goal, we help students and parents learn about PSEO and identify and lower barriers to PSEO enrollment. To learn more about our mission, donate, or stay up to date, please visit the People for PSEO website.

Catalyst for Systems Change is a Minnesota based nonprofit organization focused on breaking down barriers across education, workforce, housing, and civic engagement through experiential learning, youth leadership, and community driven systems change strategies.

# List & Status of High Schools

In the first column, "Number" refers to the order in which we reviewed school districts and charter schools. Our analysis was conducted in alphabetical order. In the second column, "Tag" refers to whether we identify the school district as an Independent School District (ISD) or as a charter school (Charter). The third column lists the name of the school district or charter school in question. The fourth column (PSEO Page Status (2026)) indicates the status of the PSEO Page in *this year's* 2026 report.

| Number | Key | School Districts | PSEO Page Status (2026) | Website "cannot be found" but links to MDE |
|---|---|---|---|---|
| 1 | ISD | A.C.G.C. Public School District | PSEO Page cannot be found | Yes |
| 2 | Charter | Academic Arts High School | PSEO Page has missing information | |
| 3 | ISD | Ada-Borup Public School District | PSEO Page is up to date | |
| 4 | ISD | Adrian Public School District | PSEO Page is up to date | |
